And the mountains echoed By Khaled Hosseini	A new novel about how we love, how we take care of one another, and how the choices we make resonate through generations. In this tale revolving around not just parents and children but brothers and sisters, cousins and caretakers, Hosseini explores the many ways in which families nurture, wound, betray, honor, and sacrifice for one another; and how often we are surprised by the actions of those closest to us, at the times that matter most. Following its characters and the ramifications of their lives and choices and loves around the globe--from Kabul to Paris to San Francisco to the Greek island of Tinos--the story expands gradually outward, becoming more emotionally complex and powerful with each turning page.	813.6 HOS	HS

Canadian war posters By Marc H. Choko	As early as 1916, war posters have been collected by private collectors and public institutions. The 270 eye-catching posters featured in this book tell an important part of the history of Canada, and of Canadians, during the First and Second World Wars. Posters were used in a variety of ways - as an appeal to patriotism in aid of recruitment, as warnings to maintain national security against spies and saboteurs, and as pleas to aid the war effort. They were also	769.499 CHO	

	responsible for arousing a wide range of sentiments, including hatred, paranoia, pride and nationalism. Significant both as historical objects and as artworks, these posters reveal how the artists of the day used their skills to contribute to the war effort, marking a major chapter in the history of design and propaganda.

D-Day to Berlin	<p>From June 1944 to May 1945, US, British, and Canadian troops fought an intense campaign against the might of the battle-hardened German Wehrmacht. The campaign ultimately ended in victory, as German forces in northern Europe surrendered, but the fighting was hard and there were many difficulties along the way and many problems to solve. The first task of the Allies was to land on a hostile shore in Normandy, where, under the direction of Erwin Rommel, the Germans had put up an array of obstacles to trap the invaders on the beaches. Just getting the troops ashore on D-Day was a massive achievement in itself, but then advancing from the beachheads against the experienced Panzer formations of the German Army Group West proved a harrowing task. Eventually, Omar Bradley's First Army fought its way out in Operation Cobra, opening the way for George Patton's Third Army to spearhead an advance to the Seine and recapture Paris while the British under Bernard Montgomery advanced up the Channel coast.</p> <p>The Allied advance stalled in autumn 1944, partly because of logistics problems but also because of the still redoubtable fighting qualities of the German Army, which showed at Arnhem that it was not to be treated lightly. The Germans launched a massive counterattack in the Ardennes in December 1944, an attack that for a time threatened to cut the Allies in two. After the defeat of the Ardennes offensive, the next great task for the Allies was crossing the mighty Rhine, which they did in a series of well planned and expertly executed moves early in 1945. The stage was now set for a general push into Germany, which saw mass German surrender as the western Allies linked up with Soviet forces coming from the east.</p>	940.5421 DDA	Gr. 6+
