Child of dandelions By Shenaaz Nanji	Sabine is 15 years old and lives a comfortable life with her Indian parents in Uganda. In 1972, General Idi Amin declares that Indians must be weeded out of the country in 90 days. At first, Sabine cannot believe that Indians born in Uganda will be forced to leave their home. As the countdown continues, she sees the poverty and hostility around her. Sabine realizes that she has lived a life of privilege. Even her best friend, Zena, ignores Sabine. Soldiers raid the family home, and Sabine's parents are forced to flee. Sabine is left to take care of her brother and find a way to escape Uganda. Out of my mind By Sharon M. Draper	Eleven-year-old Melody has a photographic memory. Her head is like a video camera that is always recording. Always. And there's no delete button. She's the smartest kid in her whole school - but NO ONE knows it. Most people - her teachers and doctors included - don't think she's capable of learning, and up until recently her school days consisted of listening to the same preschool-level alphabet lessons again and again and again. If only she could speak up, if only she could tell people what she thinks and knows...but she can't, because Melody can't talk. She can't walk. She can't write. Being stuck inside her head is making Melody go out of her mind - that is, until she discovers something that will allow her to speak for the first time ever. At last Melody has a voice...but not everyone around is ready to hear it.	CS 813.54 DRA

<p>Arctic icons : By Edward Struzik</p>	<p>Up until a few years ago, many residents of Churchill, Manitoba, had doubts that a population of 1,000 or so polar bears could disappear so quickly. But now an increasing number of residents are beginning to acknowledge that they may live to see the day when the last polar bear of western Hudson Bay goes back on the ice and does not come back. Through trial and error, the people of Churchill have found a way to live with the 1,000 polar bears of western Hudson Bay. Flawed and controversial as the management of these animals has sometimes been, it is arguably one of the most successful conservation success stories in North American history.</p>	<p>304.27 STR</p>
