

Crystal Clarke

I've been a Prince Albert resident since 2009. Being involved with numerous community sports and organizations has provided me an active role volunteering, coaching and as board member. Professionally, I am facilitator and consultant for over 15 years' experience working with schools, communities and boards. As a mother of two and past foster parent I have vast experiences working with schools, teachers, and supports from a number of sectors. Experience in supporting schools has shown me that there are challenges and some areas of focus required to enhance the learning opportunity. I believe that my professional skills and experience can help make change and impact these issues. I believe in the school community model.

Key issues:

Support teachers in delivering academics while supporting positive mental health for all.

Ensure students access to safe school facilities and a healthy environment.

Teachers, students and parents working together for better programs and resources.
