- 1 – portfolio with pockets
- Change of gym clothes and running shoes
- 3 boxes of Kleenex
- **Refillable Water Bottle**
- 1 Pkg. Graph Paper & 1 graph paper notebook

#### Optional Supply Suggestions (to help with organization)

- Having personal materials for class will be essential for limiting contact between students in class.
- Zippered Binders- These are an expensive investment, but are essential for students that have a hard time keeping materials together. They are usually well-made and can be used year after year.
- Pencil case and writing materials (pens, pencils erasers, highlighters, reinforcements) to go in **each binder**. The pencil cases with holes allow them to remain in the binder. This helps the students make sure they have the necessary materials for each class.
- Colour coordinated materials- Binders and accompanying material can be colour coordinated so that a student can easily identify the proper materials for each class. (E.g., Math is blue, ELA red, etc.)
- Label binders with name and subject title (on the front and along the **spine**).
- Locker shelves- are recommended to help keep things organized. The lockers are very small and difficult to keep organized. Locker shelves help to keep things organized without them.
- Magnets or sticky tack for the inside of the locker door also help with organization
- Magnetic baskets for the inside of the locker door, to keep extra pens, pencils, and other materials
